In order to continue delivering highly qualitative and innovative game plays we are looking for a motivated and passionate Senior Service Programmer (Java) (f/m/d) that aspires to take games to the next level. In ambitious projects you will build up and maintain high-value productions as Developer in a multi-cultural team. With your experience, you are able to provide a strong technical background, collaborate with teams all around the world and support the team to create a great online services suite for Ubisoft Games (including AAA Games)!

## Your Objective

- You develop and maintain new and existing online service used throughout the company
  - You define and design software requirements and specifications based on user requirements
  - You cooperate with project management to ensure on-time high quality delivery for the product departments
  - You thoroughly document your work in order to transfer knowledge to your team members
  - You are able to create a development plan and break it down into small, clear tasks
- 
- Over 7 years' experience as a software engineer (Java or other JVM languages, industry standard frameworks)
  - Strong background in Restful Web Services (both consuming and producing sides)
  - Micro Service Architecture experience
  - Knowledge of Agile and Continuous Delivery practices
  - You are able to work in an agile, English speaking team
  - You are familiar with analyzing and debugging performance issues

## Bonus Level

- Experience with DevOps culture
- Experience with AWS or other cloud providers
- Experience with Linux

## Your Benefits
