As our new freelancer you will be focused on developing a PC Client Installer (Windows) and a PC Client Update (platform independent).

- R&D/evaluation of the best choice/combination of library/tools for the desired product scope
- programming tasks related to the deliverables listed below
- collaborate with other teams and programmers which are responsible for the client artifacts, build & deployment pipelines as well as backend & hosting solutions for client artifacts
- documentation & handover

- Highly proficient in a modern programming language (e.g., C++, C#, ...)
- Highly proficient in a modern scripting language (e.g., Python, JavaScript, ...)
- Experience with Software Installers and Installer Libraries/Toolsets (e.g., NSIS, InstallShield, Squirrel, etc. pp.)
- Experience with package manager solutions (e.g., NuGet)
- Experience with the following topics is preferable:
 - cross platform (Windows, Mac, Linux) development
 - remote patching solutions

- We estimated the timeline for our freelancer to be 4-6 months
