Audio Designer will oversee creation and implementation of all audio content of one or more games following the concept of the Audio Director on the project.

What you will do:

- Create and enhance game features and gameplay mechanics with their audio designs by working closely with other departments
- Analyse a game's high-level game mechanics and determines how its audio treatment affects them
- Actively participate in playing the build and debug implementations to ensure the quality of the final product
- Document technical and artistic section of the audio design document to determine the style of the soundscape
- Respect budget and performance constraints when carrying out assignments
- Collaborate with Audio Programmers and Programmers to establish systemic and specific features for the audio engine and/or game engine
- Collaborate with Audio Programmers and Programmers to develop audio tools
- Define and estimate features and tasks for projects
- Digital audio processing and studio maintenance
- Participating in recording sessions, giving input and comments
- Respect audio standard protocols
- Follow internal and international Mixing standards

What you bring:

- College diploma in Audio, Sound Design, Music or other relevant training
- Excellent skills in Audio Middleware (Wwise)
- Profound skills in at least one professional DAW (Reaper, Nuendo) and Audio Editing Tools (Wavelab, Soundforge, etc.)
- Good skills in Game Engine Editors (Unity, Unreal, etc.)
- Basic knowledge with visual scripting Tools (e.g. Max MSP, Pure Data)
- Experience in Performance
- Experience in scripting/coding (C++, C#, Python, etc.) is a plus
- Experience in 3D Software (Maya, 3DS Max) is a plus

- Being able to closely adapt the audio vision
- Being used to work on tasks autonomously and to deliver results in time
- Very good communication and team work skills
- Fluent in English, both verbally and written
