

# Technical Designer [Unannounced Project] (f/m/d)

**Berlin - Full-time - 744000016020605**

Apply Now:

<https://jobs.smartrecruiters.com/Ubisoft2/744000016020605-technical-designer-unannounced-project-f-m-d?oga=true>

A Technical Designer is a solution finder and liaison between designers and other disciplines. They help with shaping the architecture of complex features and location ingredients; as well as creating and implementing complex technical design elements into the game. They are advocates for production efficiency and product quality for system development and world creation by mentoring others and highlighting constraints.

## What you will do:

- Implement and take ownership for complex features and location setups
- Optimize feature implementations and generalize recurring blocks of logic into reusable libraries
- Provide constructive, critical feedback and accurate risk assessments for production and other departments for planned features and locations considering engine and toolset constraints
- Review built locations and features to ensure they are set up according to metrics, with budget limitations in mind, and stay in a maintainable state
- Create training materials and conduct workshops for designers and level artists working on locations or features to advocate best practices
- Debug issues with features or locations and implement or suggest reliable solutions until production has ended
- Obtain in-depth knowledge of engine and data authoring tools to identify potential areas for improvement, to grow troubleshooting expertise, and to directly support game and level designers should they encounter issues

## What you bring:

- Ideally ~1-2 years of technical design experience / Alternatively equivalent experience in a related field:
  - level or game designer with a strong focus on technical implementation
  - gameplay programmer with a strong focus and understanding of game or level design
- Solid experience and knowledge of:
  - (Visual) Scripting languages and programming concepts
  - Game editors and engines
- Demonstrated understanding of design principles and the workflows needed to achieve them

- Ability to work with complex logic and data structures which are reusable and modular
- Solid organizational skills
- Ability to write clear and concise technical documentation for technical and non-technical audience
- Being creative (original and resourceful in finding solutions)
- Good communication skills and desire to build strong ties with both technical and design departments on the project
- Being proactive and solution-oriented
- Ability to communicate constructively with positivity and respect for others
- Ability to give and receive feedback and drive the iterative process
- Good English verbal skills, both orally and in writing
